BENEDICT Z. CASTRO

Technical Data Sourcing & Enrichment Specialist | Data Research Analyst | Python, SQL, Web Scraping & CRM Data
Cabanatuan, N.E 3100 | benedict.zcastro@gmail.com | linkedin.com/in/benedictzcastro

Professional Profile

Technical Data Sourcing & Enrichment Specialist with experience in Python-supported data collection, web scraping, SQL/database work, public-source research, prospect enrichment, data cleaning, validation, deduplication, and CRM-ready dataset preparation. Supports GTM, sales intelligence, account research, trust & safety, and business operations teams by turning messy public-source data into structured, usable outputs.

Core Skills

Python/Data Collection: Python, requests, BeautifulSoup, Selenium, Playwright, pandas, APIs, browser dev tools, JSON, CSV, regex, Jupyter notebooks, Databricks
SQL/Data Systems: SQL Server, queries, joins, CTEs, stored procedures, reporting logic, database troubleshooting, data validation, Excel exports
CRM/GTM Data: HubSpot-ready imports, Apollo enrichment support, CRM-ready CSVs, company/contact enrichment, ICP tagging, source notes, field standardization
Research/Data Quality: public-source research, LinkedIn/company/contact sourcing, prospect lists, speaker/event data, regulatory/project research, data cleaning, deduplication, cross-source validation
Software: ASP.NET MVC, C#, JavaScript, jQuery, AJAX, Razor views, iTextSharp, EPPlus

Professional Experience

Data Sourcer — **Bayanihan Partners** — **Apr 2025 - Present**

- Support client-facing technical data sourcing, GTM research, prospect enrichment, startup/venture intelligence, regulated-industry account research, and CRM data preparation workflows.
- Source and validate company/contact data from public sources, LinkedIn, company websites, regulatory records, event programs, agency directories, industry databases, startup ecosystem databases, and commercial enrichment tools.
- Build ICP-aligned prospect lists with names, titles, companies, emails, phone numbers, LinkedIn URLs, locations, sectors, source notes, and prioritization details.
- Prepare HubSpot-ready import files, Apollo enrichment inputs, CRM-ready CSVs, and structured Google Sheets for sales outreach, account targeting, research review, and CRM upload.
- Enrich company profiles with segment, HQ location, timezone, postal code, employee count, revenue estimates, descriptions, websites, phone numbers, and public LinkedIn links where available.
- Research decision-makers across regulatory, compliance, permitting, legal, environmental review, innovation, AI, corporate development, capital projects, business development, startup/venture, and executive leadership functions.
- Organize outputs into tabs, priority tiers, ICP notes, source notes, validation notes, and CRM-ready structures to improve enrichment, deduplication, review, and import readiness.

Software Engineer (.NET) — **Apr 2024 - Apr 2026**
Software Developer Apprentice — **ServingIntel** — **Jan 2024 - Apr 2024**
Software Developer Intern — **Sep 2023 - Dec 2023**

- Developed and maintained enterprise ASP.NET MVC/C# web applications involving customer records, transaction data, reporting workflows, payment logic, administrative tools, and PDF/Excel exports.
- Built and optimized SQL Server queries, stored procedures, CTEs, joins, aggregations, and reporting logic for transaction, payment, resident, and meal plan data.
- Implemented PDF and Excel exports using iTextSharp and EPPlus, aligning exported reports with UI logic, formatting, totals, filters, date ranges, and business rules.
- Worked on data-heavy modules including Customer Account Statements, Transaction Reports, Gift Card Liability Reports, People Groups, Resident Management, Site Settings, and payment-related features.

- Resolved bugs across backend logic, SQL queries, UI behavior, exports, legacy data, grouped customer records, payer IDs, billing IDs, overages, adjustments, and payment scenarios.
- Collaborated on code reviews, pull requests, QA testing, deployment preparation, and implementation documentation.

Junior Freelance Data Analyst **ActiveFence** **Sep 2023 - Jul 2025**

- Conducted public-source platform research and structured data collection across social media and online community platforms for trust & safety, risk monitoring, lead generation, and research workflows.
- Built and tested Python-based workflows for extracting profile, post, media, follower/following, and engagement-related information.
- Prepared structured scraping outputs in CSV/tabular formats and documented methodology, data models, technical approaches, test plans, edge cases, and script instructions.
- Evaluated custom scraping, APIs, third-party tools, and data vendor options; reviewed public links and categorized potentially harmful or policy-violating content based on defined abuse types.

Research Experience

University Research Associate **University of the Philippines Diliman** **Sep 2017 – Aug 2018**

- Supported research programming and modeling work for marine science projects involving ocean modeling, coral reef connectivity, and genomic resources for stock delineation.

Science Research Specialist **Mariano Marcos State University** **Aug 2014 – Jun 2017**

- *Supported Phil-LiDAR 2 research involving LiDAR data processing, modeling, validation, and resource assessment for Northern Luzon.*

Education

Caen, Normandie, FR **Université de Caen Normandie** **Sep 2019 – Jan 2020**
Padova, Padova, IT **Università degli Studi di Padova** **Oct 2018 – Aug 2019**

- Erasmus Mundus Joint Master Degree in Nuclear Physics (Completed 84 ECTS)
- Graduate Coursework: Theoretical Physics, Computational Modeling and Simulations, Nuclear Physics, Data Analysis and Machine Learning, Internship

Baguio City, Benguet, PH **University of the Philippines - Baguio** **Jun 2010 – Apr 2014**

- Bachelor of Science in Physics, *Magna Cum Laude*
- Coursework: Physical Modeling and Simulations, Analytical and Numerical Methods, Fundamental Physics, Computational Physics, Experimental Physics

Certifications

- Master Python Web Scraping & Automation using BS4 & Selenium – *Udemy (January 2025)*
- AI For Developers With GitHub Copilot, Cursor AI & ChatGPT – *Udemy (January 2025)*
- .NET Core MVC – *Udemy (August 2024)*
- Complete C# Masterclass – *Udemy (August 2024)*
- .NET Full Stack Foundation – *Coursera (November 2023)*
- C# Console and Windows Forms Development with Entity Framework – *Udemy (November 2023)*
- IBM Data Science Professional Certificate – *Coursera (Issued October 2023)*
- Power BI Desktop Essentials – *DataSense Analytics (Issued Feb 2023)*
- AI Fundamentals Verified Skill – *DataCamp (Issued August 2023)*
- Applied Data Analysis and Machine Learning – *Michigan State University (Issued Jan 2020)*
